

SIDEWALK REQUEST FOR THE CITY OF CONCORD *Pedestrian Improvement Program*

In order to prioritize sidewalk needs, each missing sidewalk segment identified in the City of Concord is scored based upon criterion related to safety, connectivity and pedestrian generators. The Pedestrian Improvement Program (PIP) list is used to maintain and update these scores as necessary. Greater emphasis is given to areas where high pedestrian traffic is generated by destination points like schools, parks, bus stops etc. Sidewalk requests are calculated into the overall score of the specified segment. These scores ultimately help prioritize future sidewalk project areas within the City of Concord as funding allows.
