

You Can Help Protect the Environment by Contributing to NC GreenPower!

EST 2003

For as little as \$4 a month, you can help NC GreenPower build up the supply of green energy produced for the NC electric grid. Every \$4 contribution offsets the higher costs of producing one (1) block or 125 kWh of power from renewable energy sources and provides grants to N.C. K-12 schools for educational solar installations.

Over a year, that monthly tax-deductible contribution will add 1,500 kWh of green energy to North Carolina's power supply and help install solar on school campuses. That's like not burning 1,215 pounds of coal or planting 240 trees!

Please fill out and include this enrollment card along with your bill payment.

Yes! I want to contribute to a cleaner environment.

Please add my NC GreenPower contribution to my electric bill.

My monthly contribution:

\$4 a month \$12 a month
 \$8 a month \$20 a month
 \$ __ a month (any amount in increments of \$4)
